

Course Registration Policy

This document is synthetic sample content for the UIS CampusAI portfolio project and does not represent an actual university policy.

Eligibility

Students in good academic standing may register for courses during their assigned registration window. A registration hold placed by the Registrar, Bursar, or Health Services office will prevent registration until resolved.

Credit Limits

Undergraduate students may register for up to 18 credit hours per semester without approval. Students wishing to register for more than 18 credit hours must obtain written approval from their academic advisor and dean.

Prerequisites

Students may not register for a course without having satisfied its listed prerequisites, unless granted an override by the offering department.

Late Registration

Registration after the first week of classes requires instructor permission and is subject to a late registration fee assessed by the Bursar's office.
